
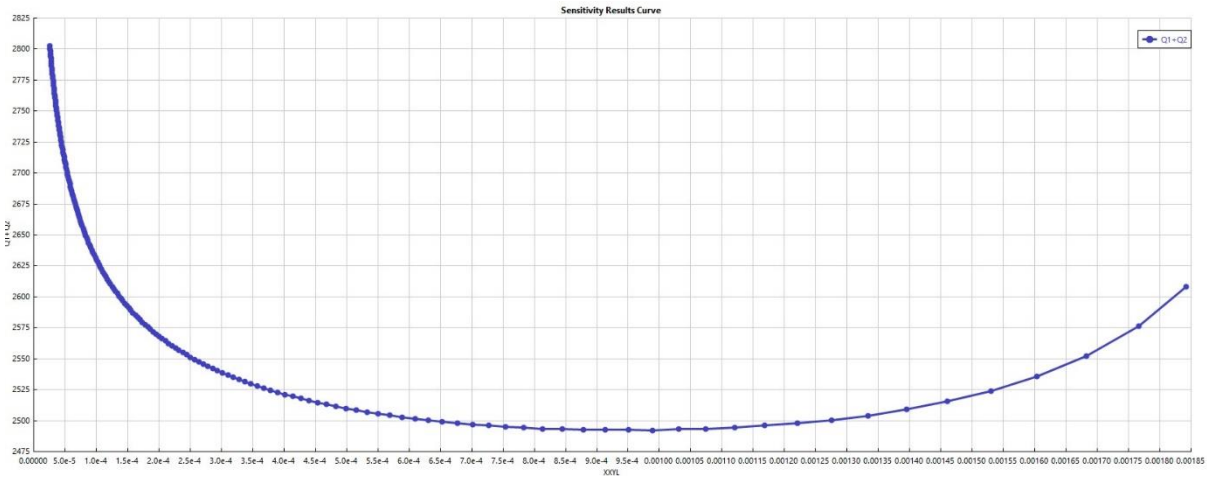
Direct split

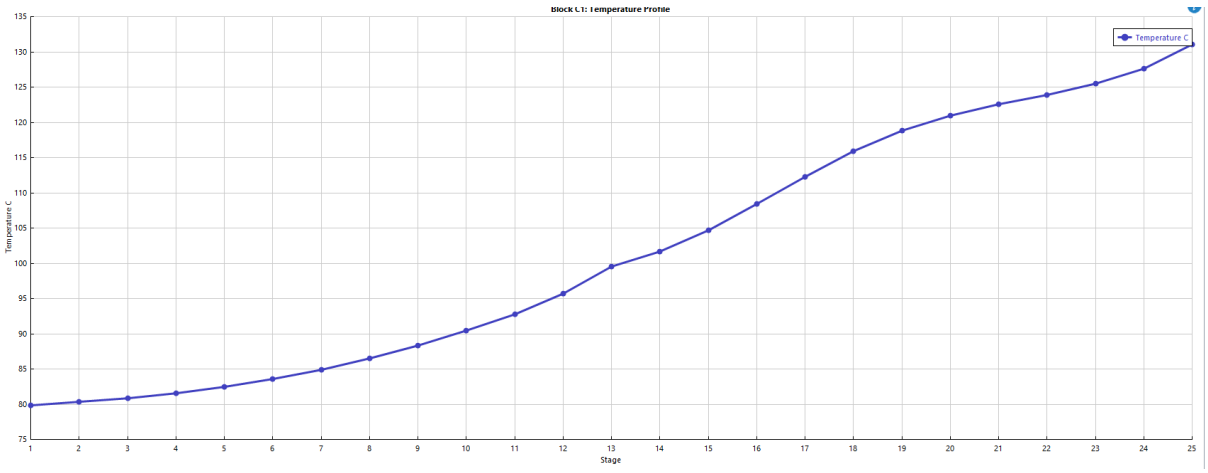


Indirect split

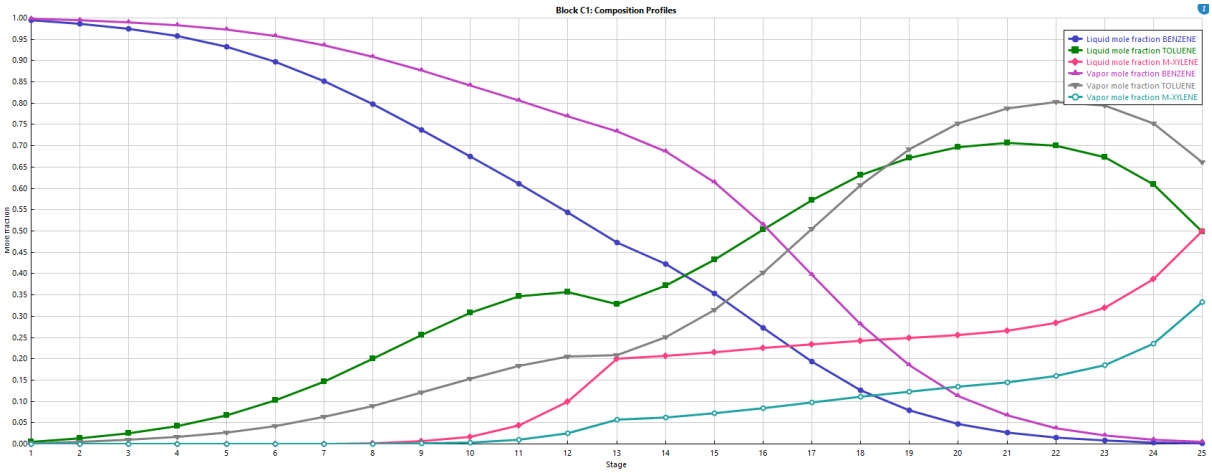
From these diagram of direct and indirect split for total reboiler energy vs impurity we observe that direct split is more economical.

In direct split

C1:

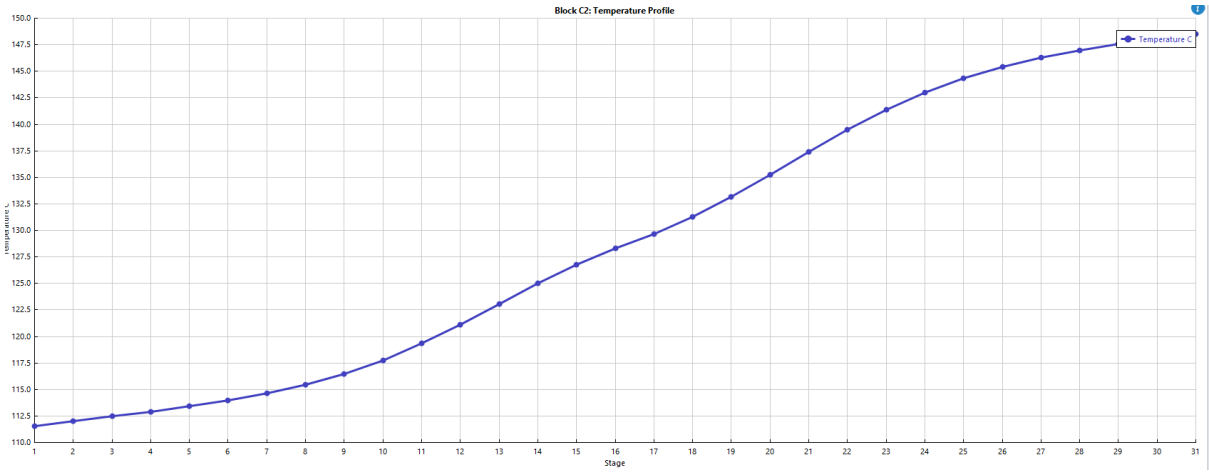


Block C1: Temperature Profile
Temperature C
Stage
Temperature C

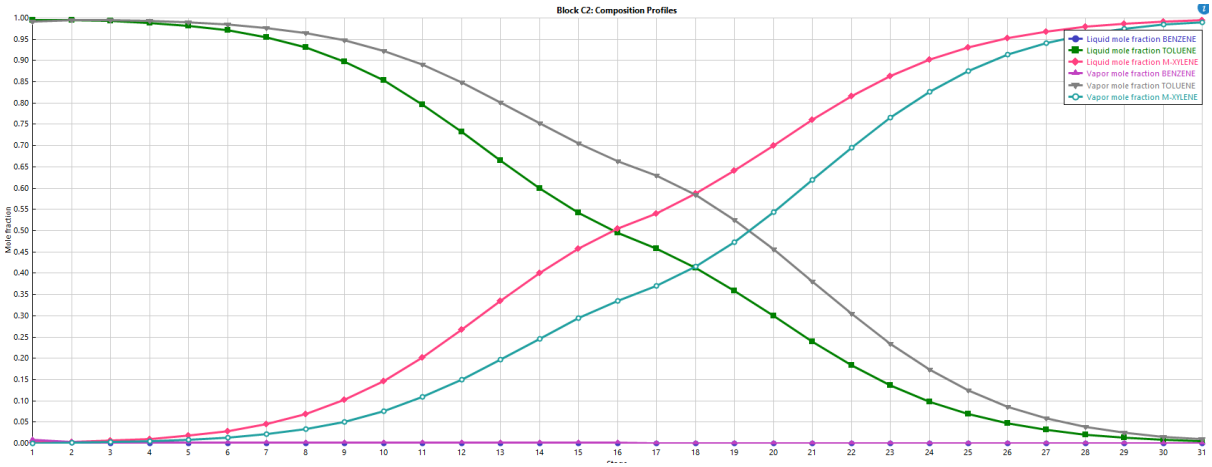


Block C1: Composition Profiles
Liquid mole fraction BENZENE
Liquid mole fraction TOLUENE
Liquid mole fraction M-XYLENE
Vapor mole fraction BENZENE
Vapor mole fraction TOLUENE
Vapor mole fraction M-XYLENE
Mole fraction
Stage

C2



Block C2: Temperature Profile
Temperature C
Stage



Indirect split
